FLYING HOURS PM

Powered by CAFDEx®

Comprehensive Adaptable Capabilities for DoD Flying Hour Forecasting, Execution and Analysis

***The appearance of U.S. Department of Defense (DoD) visual information does not imply or constitute DoD endorsement.

FHPM Supports

- Validation of Interfaced REMIS Data
- Maintenance of Squadron Log (AFTO 781)
- Maintenance of Flying Hours
- Cross validation to hours flown data
- Tracking of Program against President's Budget (PB)
- Tracking of Execution Progress
- Analysis and Reporting

Exclusive Capabilities

- Supports command and unit level hours realignment and coordination
- Facilitates "what if" drills for hours planning and allocation
- Interfaces with REMIS and other systems to track hours flown
- Incorporates system business rules to correct transaction disconnects; tracks correction to source system
- Other capabilities include: Auto-calculation of cost per flying hour by rate, calculation of spend rate, and audit tracking of changes

Key Benefits

- Facilitates audit compliance for tracking and reporting flying hours (AFI 21-103)
- Maximizes Flying Hour Program Management – tools increase data visibility, efficiency and effectiveness
- Intuitive system interface helps with quick onboarding of new personnel

The Flying Hour Program (FHP) Advantage

- Cloud-ready application operating in a .Mil environment
- Authority to Operate (ATO)
- CAFDEx® certified developers and trainers.
