

FUEL INFLIGHT PM

Powered by CAFDEX®

Comprehensive Adaptable Capabilities for Creating Real-Time Digital Inflight Refuel Documentation (DD791)

***The appearance of U.S. Department of Defense (DoD) visual information does not imply or constitute DoD endorsement.

FIPM Supports

-  Mobile Support for DD791 Entry
-  Continuous Data Validation
-  Tracking of DD791 Bill reconciliation
-  Process Support for Different Stakeholders
-  Maintenance of DD791 Amendment
-  Analysis and Reporting

Exclusive Capabilities

- Workflow and coordination tools for approval of DD791 by all stakeholders (Boom Operators, FMS, WRDCO, POL, Command)
- Boomer one-stop shop for efficient and accurate digital fuel transfers
- Manage and apply dynamic business rules for data capture, reporting and aircraft validation
- Provides FMS digital sign-off for all foreign transactions
- Automated workflow DD791 from start to process completion
- Provides electronic DD791 and searchable database of DD791's
- Audit tracking of changes on each DD791

Key Benefits

- Facilitates audit compliance for submitting and reconciling DD791 (AFI 11-253)
- Processable DD791's available for immediate billing
- Elimination of redundant data entry
- Efficiencies across the process reducing manual workload up to 70%
- Intuitive system interface helps with quick onboarding of new personnel

The Flying Hour Program (FHP) Advantage

- Cloud-ready application operating in a .Mil environment
- Authority to Operate (ATO)
- CAFDEX® certified developers and trainers.

FIPM integrates with other products in the FHP Suite
